

POWER

PREMIUM+ PDU WITH RACKLINK™

NEW

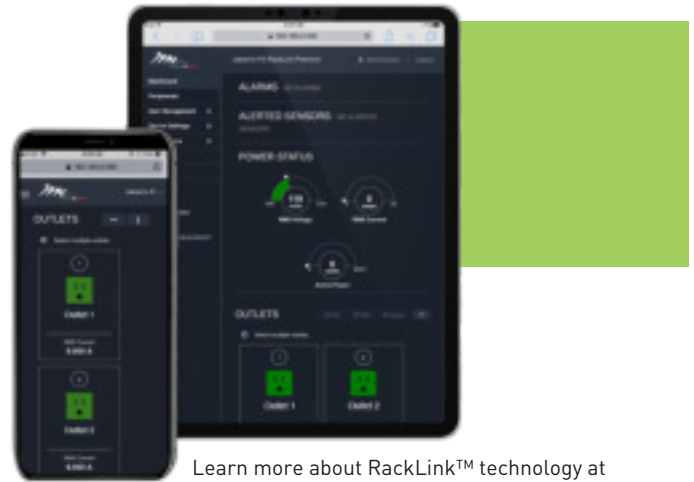

SIMPLE SYSTEM SETUP WITH ADVANCED CAPABILITIES

Securely monitor, control and manage your AV systems by unleashing the full potential of RackLink™ with the new Premium+ PDU.

Get individual outlet power cycling/metering, advanced system monitoring and control and maximum network security with Premium+ PDUs with RackLink .

- Save programming with integrated scheduling, variable timed sequencing, ping sequencing, auto healing, thresholds, and multiple notification options.
- Easily connect to control and IT systems with universal compatibility through custom drivers, SNMP v3/MIB, RESTful API, and 3rd party integrations.
- Connecting via Wi-Fi with a 3rd party dongle dramatically reduces the number of Ethernet runs required
- Configure one PDU or a thousand PDUs in a matter of moments with the ability to save your configuration file
- Remotely update firmware without having to shut down the PDU, ensuring consistent system uptime
